Joun Won

Independent Researcher · Haeryong High School, South Korea

jounwon5@gmail.com · GitHub · LinkedIn · ORCID 0009-0009-2492-1721 · Portfolio

RESEARCH INTERESTS

Interpretability, reinforcement learning, Symbolic policy, XAI, Learning-based control

EDUCATION

Haeryong High School, South Korea — 2025 – Present

PUBLICATIONS

Won, J. What Do RL Spacecraft Guidance Policies Learn? Symbolic Distillation against a Known Control Law. *NeurIPS 2026 Workshop on Interpretability for Discovery.* Paper (OpenReview) · Code

AWARDS & HONORS

- **2026** — Encouragement Award and Kwon Myeonghui Award, Korean Young Physicists' Tournament (KYPT) 2026, as Team Haeryong CASS
- **2026** — Best Poster Award, KENTECH 3rd Symposium on Sustainable Energy Transition (SSET), for *An Integrated TFT–MPC Framework for Optimal ESS and LNG Dispatch under Grid Congestion: A Case Study of the Honam Region.* Poster · Code

RESEARCH & TECHNICAL PROJECTS

- **OpenRoboticDog-RL** — Reinforcement-learned, joystick-controlled walking policy for the OpenRoboticDog quadruped, built with HR Robotics at Haeryong High School. Code
- **RoArm-M2 Pick-and-Place** — Voice- and text-commanded pick-and-place system for the RoArm-M2 robot arm, built with HR Robotics at Haeryong High School. Code

LEADERSHIP

Co-founder, Open-Age Academia — Started after hitting the same obstacles as a high-school researcher, to make the path clearer for the next student.
